- Manufactured Since 2006
- Multivolt System Available

ECE  
Approved

IP67  
Rated

EMC/R10  
Approved

## The Tradesman Choice for Reliability and Durability

Benchmark Lifetime Warranty series from LED Autolamps. The only rear combination lamps in Australia with a lifetime warranty. We guarantee it for 20 years.

First introduced in Australia December 2006 with a lifetime warranty and as of January 2020, LED Autolamps have sold over 1.2 million units with a minimal 0.2% return rate. This product is built to the highest quality standards and comes with a lifetime guarantee. An Australian first for rear combination lamps, making the 100/150 Series lamps the most reliable rear combination LED automotive product in Australia.

Manufactured using high-quality LEDs and associated components to drive the LEDs within their electrical parameters and using FR4 PCB material which is known to retain high mechanical values and electrical insulation qualities. The PCB is fully encased in a specially formulated polyester resin designed for durability and resistance to tearing, abrasion and heat. This procedure to the PCB design completely protects the electrical components from the elements. The lifespan of the electrical components has a manufacturer's warranty of 100,000 hours. The average trailer use is 1000 hours per year this equates to 100 years of use.

The 100/150 series is completely waterproof and rated to IP67 submersible to 1 metre. The cabling and plug system has tinned copper wire; this type of wire is used in the marine industry for its resistance to corrosion and doesn't oxidize.

This lamp has been outperforming all others in its class in the auto lamps market for 14 years and is tried and trusted by major OEMs and retailers Australia wide. LED Autolamps have 100% confidence in this product which is why all 100/150 Series models include a lifetime warranty.

# DOGBONE SERIES

## LOW COST ALTERNATIVE

The Dogbone series lamps are perfect for the small trailer market with stop/tail/indicator and inbuilt reflector as standard. The standout feature of this lamp is its simplicity in the fitting. All that is required is to drill a 13mm hole for the serrated plug and wire outlet and peel off the supplied 3M tape from the rear of the lamp then secure in place. Specially designed lens and eight high brightness SMD LEDs power through enhanced optics to accomplish an incredibly bright output that outshines others in its class. A low-cost alternative that passes all required road standards without compromising on quality.

# LED Autolamps Box & Tandem Trailer Harness System

## Trusted By Trailer Manufacturers for Over 12 Years

### Innovated Harness System

The key to this system is its ease of fitting. Wiring of a trailer will be completed faster, which is perfect for trailer manufacturers, DIY, or non-skilled fitters, saving time and money. No cutting, no soldering, no taping, and a professional finish.

### Flexibility

The system consists of individual cables for box trailers to large tandem trailers with cable lengths up to 8 metres and widths up to 2.1 metres. Boat trailer cable lengths available up to 12 metres. All cables have 2 core accessory plugs that enable licence and marker lamps to be added if required.

### Cable and Plugs

The Cables and plugs are specially designed with tinned copper terminals, unique sealing plug rings, and have waterproof grease added for extra protection. All Cables and Plug sockets are IP67 rated, ensuring watertight fully submersible connection.

- **No Tools Required**
- **No Cutting**
- **No Splicing**
- **No Soldering**
- **No Joiners**
- **No Tape**

# SAFER TRAVEL FOR ALL ROAD USERS

## MERGE WITH CONFIDENCE KNOWING YOUR ENTIRE TRAILER IS INDICATING YOUR INTENDED DIRECTION.

The 97 series side marker/indicator combination lamp design will revolutionize road safety as well as help save lives. Statistics show 54% of road crash injuries and 10% of fatalities happen in the same direction incident or from a sideswipe between articulated trucks and light vehicles. Heavy to heavy vehicles statistics also show a significant proportion of same direction incidents, with 33% of them fatal.

This cutting-edge design would have all the markers down the side of your trailer act as side direction indicators. The extra volume of light would give other vehicles plenty of warning with the intention that larger vehicles are merging into traffic. To finish the range we have also made available a front and rear end outline marker version that not only functions as a marker but also acts a supplementary indicator function. This function is not ADR/ECE approved.

Offering a new modern design and appeal, this range of marker/indicator combination lamps provide the latest in innovative function and design. Featuring a surface mounted base that enables both the lens and bezel to clip neatly into place and conveniently conceals the mounting hardware with no visible screws. Standard 3 core 40cm cable or 20cm with plug connector

## Adaptable Cables and Plugs for the Marker/Indicator Lamp Series to suit the Heavy Duty Truck Harness System, go to page 32-33

Drill a 10mm hole for the wire and plug, then surface mount base using screws provided. Clip lamp in place. Please refer to ADR 13/00 for mounting instructions.

# SAFER TRAVEL FOR ALL ROAD USERS

**MERGE WITH CONFIDENCE KNOWING YOUR ENTIRE TRAILER IS INDICATING YOUR INTENDED DIRECTION.**

The 800 series side marker/indicator combination lamp design will revolutionize road safety, as well as help save lives. Statistics show 54% of road crash injuries and 10% of fatalities happen in the same direction incident or from a sideswipe between articulated trucks and light vehicles. Heavy to heavy vehicles statistics also show a significant proportion of the same direction incidents, with 33% of them fatal.

This cutting-edge design would have all the markers down the side of your trailer act as side direction indicators. The extra volume of light would give other vehicles plenty of warning with the intention that larger vehicles are merging into traffic. This function is not ADR/ECE approved.

It is manufactured using tough polycarbonate and hardened acrylic plastics for the lens and body as well as TPE plastics (Thermoplastics elastomer), which offer high thermal resistance as well as extreme durability. The makeup of these lamps will guarantee a highly durable, flexible fit that not only surpasses others in its class but exceeds DG dangerous goods ratings when combined with the plugin cable system. This new and distinctive range of marker/indicator combination lamps provides the latest in innovative function and modern design. Available in standard 3 core 40cm cable or 20cm with a plug connector.

Fix to flat surface, amber facing forward and red facing to the rear with two bolts supplied. Please refer to ADR 13/00 for mounting instructions.

## Marker/Indicator Cables, Plugs Connectors

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP68**  
Tested

**RoHS**  
Compliant

## Adaptable Cables and Plugs for the Indicator Lamp Series to suit the Heavy Duty Truck Harness System

The heavy-duty truck harness system has provisions for a separate combination marker/indicator lamps. Plugin the marker/indicator adapter plugs 7CILMB and the 7CIRMB into the harness system, then run a three-core cable to adapt the marker/indicators.

All connectors have covers available for secure fitment of the cables ensuring Dangerous Goods Rating AS2809.

### Marker/Side Indicator Lamp Splitter for Left Hand Side

Defined by its dark yellow colour the 7CILMB splits from the 7 Core cable and powers the marker lamp/LHS indicator. Connection covers are available for secure fitment and Dangerous Goods Rating AS2809.

**Part No. 7CILMB** Plug Dimension  
Width 37mm, Length 78mm

**Part No. CMBB** Cover Dimension  
Width 44mm, Length 177mm

### Marker/Side Indicator Lamp Splitter for Right Hand Side

Defined by its dark green colour the 7CIRMB splits from the 7 Core cable and powers the marker lamp/RHS indicator. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

**Part No. 7CIRMB** Plug Dimension  
Width 37mm, Length 78mm

**Part No. CMBB** Cover Dimension  
Width 44mm, Length 177mm

Indicator splitters to suit RHS and LHS Side direction  
Indicators when space is limited

Indicator splitters to suit RHS and LHS Rear  
direction Indicators when more than one Indicator  
is required at the rear of the vehicle

## Heavy Duty Harness and Lighting System

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP 68**  
Tested

**RoHS**  
Compliant

### Cable Lengths with Male and Female Plugs, use when adding 3 core cable lamps

3PMF5B		Cable Length: 0.5m
3PMF1B		Cable Length: 1m
3PMF1.5B		Cable Length: 1.5m
3PMF2B		Cable Length: 2m
3PMF3B		Cable Length: 3m
3PMF4B		Cable Length: 4m
3PMF5B		Cable Length: 5m

### 3 Core Splitter Plug

The 3P3WB is a plug that splits one cable into two, this allows the fitter to add as many combination Indicator/Marker lamps as required. Always align the arrows on the plugs to ensure the correct connection. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

**Part No. 3P3WB**

**Part No. 2P3CB**  
Cover for the 3P3WB.

**Part No. 97ARIMCSB**

## Harness System Marker Cables, Plugs, Connectors

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP68**  
Tested

**RoHS**  
Compliant

### Adaptable Cables and Plugs of the Marker Lamps Series to suit the Heavy Duty Truck Harness System

The heavy duty truck harness system has provisions for multiple marker lamps. Simply plug in the marker lamp adapter plug into the harness system, then run a 2 core cable to adapt a marker lamp, if you require a second marker lamp then add the 2 core splitter 2P3WB for an extra cable to connect the lamp.

All connectors have covers available for a secure fitment of the cables insuring Dangerous Goods Rating AS2809.

#### Dual Marker Lamp Splitter

The 7CMFB is a splitter from the 7 Core cable that powers both the left and right marker lamps, the 7CMFB is a dual splitter at right angles to the 7 Core cable. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CMFB Plug Dimension  
Width 60mm, Length 78mm

Part No. CMAB Cover Dimension  
Width 130mm, Length 177mm

#### Dual Marker Lamp Splitter

The 7CFFB is a splitter that runs parallel with the 7 Core cable and powers both the left and right marker lamps, the 7CFFB is a dual splitter inline to the 7 Core cable. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CFFB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBBB Cover Dimension  
Width 44mm, Length 177mm

#### Marker Lamp Splitter (Inline)

The 7CFB plug is a splitter that runs parallel with the 7 Core cable and powers the marker lamps. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CFB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBB Cover Dimension  
Width 44mm, Length 177mm

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

## Cable Lengths with Male and Female Plugs, use when adding 2 core cable lamps

2PMF.25B	25 centimetres
2PMF.5B	50 centimetres
2PMF1B	1 metre
2PMF1.5B	1.5 metres
2PMF2B	2 metres
2PMF2.5B	2.5 metres
2PMF3B	3 metres
2PMF4B	4 metres
2PMF5B	5 metres

## Cable Lengths with Female Plugs and bare wires, use when adding other brands

2PF.25B	25 centimetres
2PF.5B	50 centimetres
2PF1B	1 metre
2PF2B	2 metres
2PF3B	3 metres

### 2 Core Splitter Plug

The 2P3WB is a plug that splits the marker cable into two, this allows the fitter to add as many marker lamps as required, always align the arrows on the plugs to ensure the correct connection. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

#### Part No. 2P3WB

To be used when more than one Marker lamp is required.

#### Part No. 2P3CB

Cover for the 2P3WB.  
Width 35mm Length 126mm

# 284 SERIES SEQUENTIAL SMALL TRAY & TRUCK SERIES

The European inspired design 284 series rear combination lamps are our latest addition to the rear function range. Intensified by a diffused tail light is a sequential indicator that lights up in a dynamic sequence. These lamps also offer a stop function as well as a reverse lamp and neatly positioned within the design an inbuilt reflex reflector all cleverly blended together in one compact unit. Exclusively available from LED, these lamps are ECE Australian road approved as well as EMC protected.

- **LED Exclusive Product**

# 223 SERIES

## SMALL TRAY & TRUCK SERIES

Featuring an innovative multi-fit design with the ability to adjust your screw down positions, making it ideal for older installations with existing predrilled holes. This addition makes these lamps either a direct replacement to same shaped older styled lights or perfect for any new trailer installation. Manufactured tough for heavy-duty applications using high impact plastics with solid-state circuitry, and with IP67 ingress protection. Supplied with a sound five-year warranty guarantees you peace of mind with years of trouble-free service.

### Fitting Instructions and Technical Drawings

The screw covers on the left and right side of the lamp have been supplied not clipped-in for ease of installation. Once the lamps have been mounted using the screws provided, simply clip the covers in place. Important Note: If the screw covers ever need to be removed after installation, locate the cover slots as marked on the drawing below, carefully insert only the tip of a standard 5mm flat screw driver into a slot, and lever slightly with the screw driver to release the cover from the lamp.

# 82 TRIPLE SERIES

## SMALL TRAY & TRUCK SERIES

The 82 Series lamps are our newest and most flexible product line for unique lighting combinations. With over 12 individual parts allowing customers to pick and choose the lamp combination that suits their needs best. Mounting lamps as individuals or as a combination is a breeze with the 3M mounting tape on the rear of the lamps.

- No Visible Screws
- Low Profile Design
- 5 Year Warranty

**Multivolt  
Available**

**12 Volt  
Only**

**ECE  
Approved**

**IP67  
Rated**

### Fitting Instructions and Technical Drawings

Horizontally mount bracket onto flat surface with screws provided, ensure correct side is facing top. Remove backing from 3M tape on back of lens, run wires through desired centre hole and align the locator nodule on edge of lens with the corresponding indentation on bracket. Apply firm hand pressure to ensure lamp adhesion. Repeat for each lens until all are installed securely. Please refer to ADR 13/00 for mounting instructions.

# 355 SEQUENTIAL SERIES

## SMALL TRAY & TRUCK SERIES

The striking smooth angular lines of the new 355 series lamps will not only enhance your vehicle or trailer but make you stand out from the rest. A diffused tail light intensifies them with extremely bright sequential indicators that light up in a slick, dynamic sequence. They come standard with stop/tail/Indicator and reverse functions as well as a purpose inbuilt reflex reflector.

## Flexible Mounting Choices with Screw or Bolt on Options

Black Right Angle Bracket

Part No. 80B3SKT

Silver Right Angle Bracket

Part No. 80C3SKT

Insert a flat screwdriver between the lamp and base and carefully lever the base away from the lamp until it releases. You will need to lever from both sides of the long edge. After fitting the base using the screw or bolt option simply reposition the lamp in the base and gently push until it clicks into place.

# MAXILAMP TRIPLE

## MEDIUM TRUCK & TRAILER SERIES

Distinct in its design, the Maxilamp's powerful LED illumination is not only intensely bright but instantly recognizable on the road and is still unsurpassed by the competition. In constant production, for over 11 years, these lamps offer a solid 7-year warranty. They are now sold all over the world, with the single version fitted to the Australian Hawkei military vehicles. Manufactured robustly, IP67 ingress protection, UV resistant hardened acrylic cover, and housing with stainless steel fittings using solid-state LED circuit technology ensure you will have years of trouble-free service.

### Fitting Instructions and Technical Drawings

Horizontally mount bracket onto flat surface with screws provided, ensure correct side is facing top. Remove backing from 3M tape on back of lens, run wires through desired centre hole and align the locator nodule on edge of lens with the corresponding indentation on bracket. Apply firm hand pressure to ensure lamp adhesion. Repeat for each lens until all are installed securely. Please refer to ADR 13/00 for mounting instructions.

# 102 SERIES COMBINATIONS

## MEDIUM TRUCK & TRAILER SERIES

The 102 Series lamps offer end users an extensive range of choice to create the perfect rear combination lamp suited to their vehicle. This flexible product line offers multiple options from bracket size; single, twin or triple arrangement, and colour; black, white, or black chrome to suit your fleet.

The lamp options include choices of clear, coloured, or black chrome lenses and lamp voltage, either 12 volt or 12-24 multivolt.

These lamps feature a polycarbonate lens designed for longevity along with 21 high brightness LEDs in each lamp, providing clear signal lighting for surrounding drivers. All of the lamps are ADR Australian Road Approved to maintain your vehicle's roadworthiness and are IP67 rated to protect from any dust or water ingress.

Featured in this article are combinations that you can choose. To order, select your bracket and choose your lamps to suit the bracket. These lamps can also be recess mounted without a bracket.

For more information regarding each individual lamp, visit page 110-111.

## Functional, Long Lasting Quality

### Innovated Harness System

The key to this system is its flexibility by offering every conceivable option for various lighting functions to be added at any point in the truck harness line.

### Flexibility

Cable lengths from 0.25m to 15m combining heavy duty connector covers for every plug and connector assembly point with a breaking strain in excess of 25kg, making this a heavy duty robust truck harness assembly.

### Colour Coded

All assembly plugs are colour coded to its specific function. Example - The Brown plug is for Marker Lamps. When requiring a marker lamp, add a brown plug in the harness line, add the desired length 2 core cable and plug into the desired marker lamp. The Yellow (LHS) or Green (RHS) plug is for Side Direction Indicator Lamps. When requiring a Side Direction Indicator lamp, add a yellow or green plug whether left or right hand side in the harness line, add the desired length 2 core cable and plug into the desired Side Direction Indicator lamp.

- Add any Light Anywhere in the Harness System
- Easily replace damaged lighting with minimal downtime
- Heavy Duty Water Proof Cable, Plugs and Connectors
- Colour Coded Plugs to the colour of the wire function
- All Lights Compliant with ECE or ADR
- Cable System Compliant with Dangerous Goods (AS2809)
- 5 Year Warranty, Livestock Transport 1 Year Warranty
- RoHS Compliant Cables, Plugs and Lights

## Heavy Duty Harness and Lighting System

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP 68**  
Tested

**RoHS**  
Compliant

### Cable and Wire

TWP Cable (Thin wall thermo plastic) and PVC Automotive primary wire complying with SA-J1128, Annealed copper wire in compliance with ASTM B3, RoHS compliant lead free copper wire with operating temperature between -40°C to +85°C - Harness system tested to B Double requirements when LEDs are used. Please refer to wire gauge table for further information regarding wire gauge and amperage.

### DG Rating

Cables and covers are manufactured to comply with DG (Dangerous Goods) Rating. Inspected by Work Safe Victoria and in accordance with DG-150424-1, DG-150424-2 in relation to the electrical wiring requirements as it applies to dangerous goods road vehicle bulk tankers, in accordance for usage with petrol and gas tankers. Cabling and lighting complies with AS2809 parts 1 & 2.

### Labour Costs

Designed specifically to be easily and quickly installed without the need to cut, splice, solder, join or tape wire joins, reduces fitting times with its simple plug in design allowing skilled or non-skilled fitters to complete the install. Expect to reduce lighting assembly labour costs by up to 75%.

### Warranty

Five Year Warranty for all truck & trailer vehicles and a one year warranty for livestock carrying trailers.

# **7 Core Main Cable Specifications**

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP68**  
Tested

**RoHS**  
Compliant

The cable we have chosen for this harness system is used widely in the automotive industry and complies with SA-J1128 Standards. The plugs we have designed are 100% water proof and pass IP68 Standards, our unique double ridged male plugs ensure complete water proofing by doubling the protection from water ingress.

Plugs have been designed with a special water proof double sealing lip which will not allow water ingress. Cable width 9.5mm, Male & Female plug diameter 18mm combined length of plugs when joined 106mm.

The cover for the plugs have been created for extra strength and engineered to a breaking strain of 25 kg. The connection cover is for secure fitment and completes Dangerous Goods Rating AS2809.

### 7CJB - Use at back of the Trailer for Left and Right side main cable split

The rear junction splitter has been designed to split the 7 core cable into a left and right side for rear lighting functions of Stop/Tail, Indicator and Reverse. The rear junction splitter also has a left and right side 2 pin plugs for the connection of licence plate lamps and marker lamps.

Part No. **7CJB** Plug Dimension  
Width 89mm, Length 61mm

Part No. **CCJB** Plug Cover Dimension  
Width 189mm, Length 116mm

#### 7CJB

### 7P3WB use when 2 or more combination lamps are required

The 7 Core cable splitter can be used to add another rear combination lamp to an existing rear combination lamp giving you the ability to continue the harness cable in any manner you desire

Part No. **7P3WB** Plug Dimensions  
Width 94mm, Length 44mm

Part No. **7PCB** Cover Dimension  
Width 194mm, Length 60mm

#### 7P3WB

# NEW MINI LAMPS

## SINGLE FUNCTION LAMPS

These new Mini lamps have a slick, clean, modern design that will enhance any vehicle or trailer application. Measuring just 89mm long for the 11 series and 131mm for the 12 series and only 30mm high, with 8mm on its side profile makes them perfect for small, tight spaces. They come standard with super-strong 3M tape and screws for fitting to any clean flat surface. Directed through an enhanced Fresnel style lens are high powered SMD LEDs. Ensuring the most exceptional light efficiency possible, which not only shines brightly in all functions but exceeds the stringent ECE standards for road approval.

# 25 SERIES COMPACT SLIMLINE RECESSED LAMPS

Introducing the 25 series, although small in size, they sure pack a punch when it comes to features and flexibility. The recessed fitting allows for an extreme, low profile installation. 17 high powered SMD LEDs power through a fresnel style lens, providing the most exceptional light efficiency possible, which not only shines brightly in all functions but exceeds the stringent ECE standards for road approval. Couple this with IP67 testing for dust and water ingress as well as high impact polycarbonate, the 25 series offer strength and durability, ensuring the most extended operational life possible from the light.

# NEW SUPER BRIGHT REAR FUNCTION RANGE

A sleek modern design that will complement your vehicle or trailer by featuring super-bright LEDs and ensure you not only look great but highly visible to other road users as well. These lamps exceed all standards with stringent ECE approval, and include IP67 ingress protection. Clever use of 3M tape allows flexible fitting with many combinations. Individual lens mounting, as well as black or chrome triple and quad brackets, are available separately or as an assembly. Surface mounting with no visible screws makes this range perfect for caravan, RV, tray, trailer, or any application where space and bolt access is restricted. See Pages 62 & 71 for the entire range of 82 series rear combination lamps.

Horizontally fit grommet into cut out (164mm x 58mm) in mounting surface, run wire through back of lamp and then push lamp into grommet. Please refer to ADR 13/00 for mounting instructions.

# 102 SERIES LAMPS

## SINGLE FUNCTION

Our diversity of range, as well as flexibility in design choices, makes it an easy decision to trust LED to light your caravan or RV. The 102 series lamps, as seen on caravans for over ten years, is a testament to this statement. These lamps offer a clear, coloured or black chrome lens design with single recessed fitting or a choice of four surface mounted brackets in a black, chrome or white configuration. Rest assured, you will be road legal, well lit, and have the brightest caravan on the highway.

## Fitting Instructions and Technical Drawings

Retro fit lamps. If new installation, fit grommet or stainless steel flange into cut out (cut out 139 x 91mm), plug 53102 wire into lamp and run through back then push into grommet/flange. Please refer to ADR 13/00 for mounting instructions.

## Plugs, Connectors Cables for Single Function Lamps

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP68**  
Tested

**RoHS**  
Compliant

## Heavy Duty Harness System

Many customers still prefer to use the recessed type rectangle or round lights for their trailer builds. The 7CFS series of plugs allows this to happen by splitting from the main cable a series of individual cables and plugs to suit 1/ Stop/Tail Lamp 2/ Indicator Lamp 3/ Reverse Lamp (See pages 122-123).

### Part No. 7CFSTIRLB

Cable Connection from 7 Core cable for single lamp functions Stop & Tail, Left Hand Side Indicator & Reverse

### Part No. 7CFSTIRRB

Cable Connection from 7 Core cable for single lamp functions Stop & Tail, Right Hand Side Indicator & Reverse

### Part No. 7CFSTILB

Cable Connection from 7 Core cable for single lamp functions Stop & Tail, Left Hand Side Indicator.

### Part No. 7CFSTIRB

Cable Connection from 7 Core cable for single lamp functions Stop & Tail, Right Hand Side Indicator.

## Stop/Tail Lamp Splitter Plug

### Part No. 3P3WB

To be used when more than one stop & tail lamp is required.

## Indicator Lamp Splitter Plug

### Part No. 2P3WB

To be used when more than one Indicator lamp is required, connect to the yellow or green plug.

## Reverse Lamp Splitter Plug

### Part No. 2P3WB

To be used when more than one Reverse lamp is required, connect to the black plug.

Below shows an illustration of how the Cables for single function and the Splitter plugs are used in-conjunction with single function lamps with 2 and 3 core cable with harness plugs.

## Accessory Plugs for Individual Lamps

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP 68**  
Tested

**RoHS**  
Compliant

## Heavy Duty Harness System

Colour coded depending on function, the accessory plugs allow other recessed lamps to be used in the heavy duty truck & trailer harness and lighting system.

**Part No. 3PFSTB**  
For use when fitting  
recessed stop/tail lamps

**Part No. 2PFIB**  
For use when fitting  
recessed indicator lamps

**Part No. 2PFRB**  
For use when fitting  
recessed reverse lamps

## Stop/Tail Lamp Extension

**Part No. 3PMF.25B**  
200mm Cable extension  
when using more than one  
stop/tail lamp

## Indicator/Reverse Lamp Extension

**Part No. 2PMF.25B**  
200mm Cable extension when  
using more than one Indicator or  
reverse lamp

Below shows an illustration of how the accessory plugs for individual lamps and the Cable extensions are used in-conjunction with single function lamps not fitted with harness plugs.

# SAFER TRAVEL FOR ALL ROAD USERS

## MERGE WITH CONFIDENCE KNOWING YOUR ENTIRE TRAILER IS INDICATING YOUR INTENDED DIRECTION.

The 97 series side marker/indicator combination lamp design will revolutionize road safety as well as help save lives. Statistics show 54% of road crash injuries and 10% of fatalities happen in the same direction incident or from a sideswipe between articulated trucks and light vehicles. Heavy to heavy vehicles statistics also show a significant proportion of same direction incidents, with 33% of them fatal.

This cutting-edge design would have all the markers down the side of your trailer act as side direction indicators. The extra volume of light would give other vehicles plenty of warning with the intention that larger vehicles are merging into traffic. To finish the range we have also made available a front and rear end outline marker version that not only functions as a marker but also acts as a supplementary indicator function. This function is not ADR/ECE approved.

Offering a new modern design and appeal, this range of marker/indicator combination lamps provide the latest in innovative function and design. Featuring a surface mounted base that enables both the lens and bezel to clip neatly into place and conveniently conceals the mounting hardware with no visible screws. Standard 3 core 40cm cable or 20cm with plug connector.

## Adaptable Cables and Plugs for the Marker/Indicator Lamp Series to suit the Heavy Duty Truck Harness System, go to page 32-33

### Connection Plug and Cover

# SLEEKEST CAT 6 SIDE DIRECTION INDICATOR ON THE MARKET

Trades, recreational, and 4x4 vehicles are increasingly requiring GVM (Gross Vehicle Mass) upgrades to enable greater weight capacity. A consequence of this is the need to upgrade the side direction lighting from the manufacturer's Category 5 to a Category 6 side direction indicator. This is a legal requirement when a vehicle's GVM exceeds 3500kg. The sleek, new, compact designed 77 series ensures that a vehicle with this GVM upgrade is still legally road compliant, without having to use the large, bulky Cat 6 markers currently available on the market.

## Custom Wiring Kits

We can also professionally custom-fit and supply the 77 series with plugs and wiring to patch into a specific model vehicle, ask us how.

## 3M Tape Fitting Design

### Part Number

**77AM2** - Coloured Lens, Twin Blister

<b>Function</b>	Side Direction Category 6

### Adaptable Cables and Plugs of the Indicator Lamp Series to suit the Heavy Duty Truck Harness System

The heavy duty truck harness system has provisions for a separate side direction indicator lamp. Simply plug in the indicator adapter plug 7CMIB into the harness system, then run a 2 core cable to adapt an indicator lamp, if you require a second indicator lamp then add the 2 core splitter 2P3WB for an extra cable to connect the lamp. All connectors have covers available for a secure fitment of the cables insuring Dangerous Goods Rating AS2809.

#### Left & Right Indicator Lamp Splitter

Defined by its Yellow colour the 7CMIB is a splitter from the 7 Core cable that powers both the left and right hand side indicator lamps, the 7CMIB is a dual splitter at right angle to the 7 Core cable. Connection covers are available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CMIB Plug Dimension  
Width 60mm, Length 78mm

Part No. CMAB Cover Dimension  
Width 130mm, Length 177mm

#### Left & Right Indicator Lamp Splitter

The 7CIRLB is a splitter that runs parallel with the 7 Core cable and powers both the left and right hand side indicator lamps, the 7CMIB is a dual splitter at inline to the 7 Core cable. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CIRLB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBBB Cover Dimension  
Width 44mm, Length 177mm

#### Indicator Lamp Splitters (Inline)

The 7CILB is a single splitter and runs parallel with the 7 Core cable and is used for left hand indicator. The 7CIRB is a single splitter and runs parallel with the 7 Core cable and is used for right hand indicator. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CILB Plug Dimension  
Width 37mm, Length 78mm

Part No. 7CIRB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBB Cover Dimension  
Width 44mm, Length 177mm

Indicator splitters to suit RHS and LHS Rear direction Indicators when more than one Indicator is required at the rear of the vehicle

# SUPER LOW PROFILE FRONT INDICATORS

Although small in size, the new mini 11/12 series lamps look great with a slick, clean, modern design and offer features and flexibility for bull bars exclusive to LED. Vibration resistant, and they are also comprehensively tested to extreme IP67 standards for dust and water ingress. Measuring just 89mm and 130mm in length respectively, 30mm high, and 8mm on its side profile makes them perfect for small, tight spaces. The low-profile design also provides the benefit of helping avoid unwanted impact damage. An enhanced Fresnel style lens supports three high powered SMD LEDs, ensuring exceptional light efficiency, which not only shines brightly in all functions but exceeds the stringent ECE standards for road approval. LED Autolamps have made standard the use of super-strong 3M tape with screws for fixing to any clean flat surface. The tape ensures a secure, strong adhesion and will not move even when subjected to high-pressure cleaning. These lamps have been specially designed to be fit for purpose with ease of fit in mind and will surely not disappoint.

- Slimline, Low Profile Design

## Harness System Stop/Tail Lamps and Plugs

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP68**  
Tested

**RoHS**  
Compliant

## Compatible with Heavy Duty Harness System

The heavy duty truck harness system has provisions for a separate stop/tail lamp. Simply plug in the stop/tail adapter plug 7CSTB into the harness system, then run a 3 core cable to adapt a stop/tail lamp, if you require a second stop/tail lamp then add the 3 core splitter 3P3WB for an extra cable to connect the lamp.

All connectors have covers available for a secure fitment of the cables insuring Dangerous Goods Rating AS2809.

Defined by its red colour the 7CSTB plug is a splitter from the 7 Core cable that powers the stop/tail lamps. It can be used when more than one stop/tail lamp is required at the rear of the vehicle. Connection covers are available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CSTB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBB Cover Dimension  
Width 44mm, Length 177mm

The 3P3WB is a plug that splits one cable into two, this allows the fitter to add as many stop/tail lamps as required, always align the arrows on the plugs to ensure the correct connection. Connection covers are available for secure fitment and Dangerous Goods Rating AS2809.

### 3 Core Splitter Plug

**Part No. 3P3WB**

# GRAB HANDLE LAMPS

## CARAVAN LAMP SERIES

The new stylish Grab Handle series grab handles are the perfect accessory to any caravan. Featuring an always on, low power consumption LED behind the handle provides enhanced visibility at night allowing easy location, and equipped with a push button powering the primary lamp to illuminate dark surrounding areas. Built tough, this handle is designed to withstand the rigors of the environment.

# BOATING & MARINE LIGHTING RANGE

Marine environments demand durability and performance to operate reliably in highly corrosive and harsh marine conditions, rest assured LED Autolamps range of marine products will keep you safely lit for longer. Our lamps are manufactured to withstand and thrive in some of the harshest environments in Australia, and we make available the perfect selection for you to kit out your boat and trailer.

## Search Lighting

Our latest addition is the high powered searchlight, which has a 60-watt spot beam. It also gives the versatility of 360-degree rotation and a 60-degree tilt function. The supplied remote control allows you to operate the lamp wirelessly as well, built in Bluetooth connectivity to your smartphone.

## Navigational Lighting

Navigational lighting is critical to avoiding vessel impacts at sea. Since 2008 our 52 series Port, Starboard, stern, and towing lamps have stood the test of time. The 52 series comply with the Uniform Shipping Law codes Section 16 Collision Regulations (Colreg).

## Underwater lighting

Water level scene lights adds a personal touch or gives you a clear view of the water level with any night activities. The 91 series comes standard with three high powered 1 watt LEDs that give a full 180-degrees of illumination and are available in 4 colours for you to choose.

## Flood/Work Lighting

A series of high brightness Marine flood lamps, which can give you the extra lighting you want precisely where it's needed. Specially designed optics with high brightness LEDs ensure the most efficient light output possible. Tested to IP67 standards, these lamps have excellent resistance to acidic and alkaline conditions to ensure they are ready for any water born adventure.

## Cabin Lighting

When it comes to lighting your boat interior, we have the products that are perfect for the job. Strip lighting, step as well as switch and sensor options spoil you for choice, and with many different design options, there is a light that will surely suit. All of our waterproof interior lighting offers high powered LEDs that deliver the perfect amount of light output you need.

## Boat Trailer Lighting

We offer two of the most popular boat trailer lamps available. The tried and tested 207 series sold since 2008 and the popular 209 series rear combination. Featuring ADR road approvals with inbuilt licence plate lights as well as being compatible with our plugin harness system. 100% submersible and specifically manufactured for marine applications.

# BOAT TRAILER LAMPS

## 100% FULLY SUBMERSIBLE RANGE

Boat trailer manufacturers all over Australia use our 209 series lamps, as well as the original 207 series, which has been one of Australia's top-selling LED boat trailer products for over 12 years. Extreme marine environments demand a product to be manufactured tough, constructed using high-quality plastics and stainless steel fittings that are fit for purpose, also tinned copper wiring for increased protection against constant saltwater exposure. The incredible bright output will ensure you stand out, and the sleek design will also enhance a new or existing trailer application. Be assured every time you use the trailer; the lighting will not let you down.

# LED Autolamps Boat Trailer Harness System

## Functional, Long Lasting Quality, Value for Money

### Innovated Harness System

The key to this system is its ease of fitting. Wiring of a trailer will be completed faster, which is perfect for trailer manufacturers, DIY, or non-skilled fitters, saving time and money. No cutting, no soldering, no taping, and a professional finish.

### Flexibility

The system consists of individual cables for box trailers to large tandem trailers with cable lengths up to 8 metres and widths up to 2.1 metres. Boat trailer cable lengths available up to 12 metres. All cables have 2 core accessory plugs that enable licence and marker lamps to be added if required.

### Cable and Plugs

The Cables and plugs are specially designed with tinned copper terminals, unique sealing plug rings, and have waterproof grease added for extra protection. All Cables and Plug sockets are IP67 rated, ensuring watertight fully submersible connection.

- **No Tools Required**
- **No Cutting**
- **No Soldering**
- **No Joiners**
- **No Splicing**
- **No Tape**

## Plug in Cable System for Boat Trailers

- 100% Water Proof
- Specially Designed Plugs
- No Assembly Tools Required

Plug in  
Connectors

IP67  
Rated

Fully  
Submersible

Wiring of a trailer can now be done quickly and easily without cutting, splicing, joining, or insulating wires & cables. The cables and plugs are specially designed with tinned copper terminals and waterproof grease with IP67 rated plugs and sockets, ensuring a watertight connection. All main cables have accessory wires at the ends of the male plugs, which are compatible with the marker lamp, plug-in cable system. Cabling system comprises of the following:

**Boat Trailer Cable** - this cable connects each light to the gooseneck area and then plugs into the boat cable joiner. The male plug to the lamp has two accessory wires for side markers.

**Boat Cable Connector** - this three-way connector joins the left and right boat trailer cables to the cable with the trailer plug.

**Gooseneck to Vehicle with Trailer Plug** - this 1-metre cable is fitted to the gooseneck. This cable ends with a trailer plug. You can also add the 5C1MB or the 5C1.5MB to extend the trailer plug length.

### Part Numbers

**Marker Lamp Cable and Plugs** - For fitting marker lamps to the trailer harness system.

# Overmass Oversize Warning Lighting

A heavy rated vehicle that carries or is designed to carry large items that are unable to be separated is referred to as an Overmass Oversize (OSOM) vehicle. In most circumstances, OSOM vehicles require specific warning devices and lighting that comply with NHVR (National Heavy Vehicle Regulator) recommendations.

By using a warning light for this purpose it must emit a yellow coloured light that has a rotating and flashing effect. A flash rate of 120 to 200 FPM and a power output of at least 25 watts when using LED technology is also required.

## Compatible Products

The following lamps are all compliant to these requirements, as set out by the NHVR. As well are thoroughly tested and certified to SAEJ845 Class 1 standards, which is the highest possible standard in this regard.

145 Series, see page 179

LB380 Series, see page 189

LB246 Series, see page 188

**145/144 Series  
Hazard/Warning  
Strobe/Rotating Beacons**

- High Powered 3 Watt LEDs
- Heavy Duty Design
- 3 Year Warranty

**11 - 32  
Voltage**

**J845 Class 1  
Compliant**

**IP67

## Strobe/Override Rotating Multifunction Beacon

### CLASS 1 SAE/J845

**Part Number**  
**145ASRM** - Blister

<b>Function</b>	Strobe/Rotate Beacon	
<b>Size</b>	144mm Round x 91mm	
<b>Voltage</b>	11-32 Volt	
<b>Cable</b>	30cm	
<b>Flash Rate</b>	90 FPM/130 RPM	
<b>Lens</b>	Polycarbonate	
<b>Draw</b>	<b>@13.8V</b>	<b>@28V</b>
Strobe	0.70A	0.46A
Rotate	0.46A	0.23A
<b>Approvals</b>	<b>Category</b>	
SAE	J845 Class 1 Rotate	
SAE	J845 Class 2 Strobe	

**OVERMASS**  
NHVR Compliant

The lamp has 4 wires, one for Earth (Black), one for Strobe (Red), one for rotating (Yellow) and one for Synchronisation (White). If only one function is to be used then you would connect that colour wire for the function required either strobe or rotate. To get the full benefit of the dual function feature simply connect all these wires to a 3-way switch. The lamps electronics is set up for Strobe (Red) and the Rotating (Yellow) overrides the strobe function. Another alternative wiring option is the Strobe (Red) wire can be connected to the ignition switch so that the strobe function is engaged while the vehicle is running. A separate two-way switch is required for the Rotating (Yellow) feature. When this switch is turned on the strobe function is disabled, the rotating function is activated.

### CLASS 1 SAE/J845

# SAE/J845 Class 1 Strobe Emergency Bars

Letting those around you know of a critical or precarious situation is essential to all breakdown, working, or responding vehicles in today's traffic. Becoming more prevalent and certainly more required now is intensely bright warning lights atop these vehicles. LED has answered this issue by adding a range of heavy-duty amber emergency bars with SAE/J845 Class 1 compliance for brightness and intensity.

<b>Draw</b>	<b>@12V</b> 0.42A

## Fitting Instructions and Technical Drawings

Fit to flat surface with three rivets supplied ensuring 4 inch "O" ring is positioned under base to ensure vibration resistance. Run wires from back of lamp.

# EMERGENCY STROBE

## SAE/J595 CLASS 1

Letting those around you know of a critical or precarious situation is essential to all breakdown, working, or responding vehicles in today's traffic. Becoming more prevalent and certainly more required now is intensely bright warning lights on these vehicles. LED has answered this by adding a range of heavy-duty coloured emergency strobe lamps that are SAE/J595 Class 1 compliance for brightness and intensity as well as inbuilt with selectable flash patterns. These lamps are super bright with a smooth low profile compact fit that makes them perfect for any emergency application.

- High Brightness LEDs
- Selectable Flash Patterns
- Synchronise Up to 20 Lamps
- Compact Low Profile Design
- 3m Tape/Screw Fitting
- 3 Year Warranty

### Flash Selection Instructions

1. Connect Red wire to power and Black wire to earth to power the lamp.
2. Tap Brown wire to power to cycle through the flash patterns.
3. Hold Brown wire to power for 7 seconds to reset to the start (Constant Flash Pattern #1).

### Simultaneous or Alternating Flash (when using multiple units)

1. To enter grouping mode, connect all Red and Brown wires together, then connect to power. Each lamp will flash to identify which group they belong to.  
Single Flash = Group 1, Double Flash = Group 2.
2. While maintaining power to Red wires, remove the Brown wires from power.
3. To change groups, tap Brown wire to power.  
Lamps that are set to the same group will flash simultaneously.  
Lamps that are in opposite groups will alternate flash.
4. Once lamps are in desired group, disconnect Red wires from power then reconnect to power to exit grouping mode.
5. Connect all brown wires together to synchronise lamps. (Hold all brown wires to power for 7 seconds to reset all flash patterns to start)

**NOTE: Maximum of 20 lamps can be Synchronised together.**

## 120033 Series Emergency Lamps 3M/Screw Mount

- Low Profile Only 8mm
- 11 Selectable Flash Patterns
- 3 Year Warranty

# FORKLIFT SAFETY LIGHT RANGE

## VISIBLY BRIGHT WORK ZONE

Pedestrian safety in the workplace is at the forefront of the development with our latest forklift safety lighting range. You are required to have installed reversing alarms and rotating beacons as per the Australian/ New Zealand standards. Yet, in a busy and noisy working environment, the addition of an early warning forklift safety lamp gives pedestrians the advantage of a first visual warning of the vehicles working area and alerting to possible danger. Specifically designed to be fitted to a forklift, scissor lift, or excavation type vehicles, our range offers both blue and red high powered light output as well as several different lighting patterns. They are robustly manufactured by using a die-cast alloy body and a virtually indestructible polycarbonate lens with an IP67 100% water and dustproof rating, ensuring long reliability and almost no machine downtime. Create a safer operating workspace by adding a forklift safety lamp to your fleet.

# LOW BEAM LIGHTBAR

## MANUFACTURED FOR BULLBARS NEEDING LIGHTING COMPLIANCE

When fitting an after-market bullbar to your vehicle the original manufacturers legal low beam headlight can become obscured. This has the propensity to make your vehicle unroadworthy. To combat this and ensure you are kept legal, we have made available a super tough, light weight low beam lightbar specifically designed to enhance a manufacturers low beam headlight. The HL250 is super bright with 1000 lumens and has a flexible swivel and tilt mount option so the lamp will be suitable for many vehicle applications.

Heavy Duty Polycarbonate Housing

8x High Power LEDs with  
1000 Effective Lumens Output

Multi-Position  
Swivel and Tilt Mounting

Hardened Polycarbonate Lens

Tough 2.5mm 304 Steel Bracket

Features a fully adjustable swivel/tilt bracket for road legal low beam function.  
Perfect for aftermarket bullbars that may obstruct factory fitted low beam headlights.

# TIR OPTICS

## TOTAL INTERNAL REFLECTION

- Magnified Light Intensity for Each LED
- No Light Loss from Glare or Scattered Light
- Focusing Each LED to its Intended Target
- Low Cost & More Bang for Your Bucks

The new TIR Optics Range. TIR stands for "Total Internal Reflection" and is the latest in optical design for use with injection molded plastic polymers that are shaped into a refractive lens inside a reflector. This in turn encompasses the on-board LEDs, harnessing the light at the source and focusing each LED to exactly where it is intended with minimal glare or stray light. Research and development into this project discovered some interesting facts. Two lamps, one a TIR lens design and the other a reflector based style both with matching specifications that include Lumen and lux outputs, showed the TIR to have a centre illumination in lux twice that of the reflector and only 6% light contributing to glare as opposed to 28% with the reflector technology.

## HIGH POWERED DRIVING LAMPS

Developed exclusively by LED Autolamps is the unique DL series road-legal driving lamps. Cutting edge design with a lightweight, super-tough polycarbonate lens and body as well as enhanced lens optics. They also feature road-legal ECE R112 high beam and ECE R7 front marker, as with an impressive 610m road beam projection, making them perfect for all bullbar applications.

# REVERSE LAMP FACTS

## Reversing Lamp Definition

Reversing lamp is designed to illuminate the road to the rear of the vehicle and to warn other road users that the vehicle is reversing or is about to reverse. These lamps are governed by some performance qualities. The intensity of light emitted has a minimum of 80 candelas along the axis of reference and cannot exceed 300 candelas at or above the horizontal plane, or 600 candelas below the horizontal plane, and the colour of the light must be white. The ADR that specifies the lighting performance requirements is ADR 01/00. This Standard uses the definition within the ECE 23 Regulation. ADR 13/00 specifies the installation and position of the approved ADR 01/00 or ECE 23 lamp. This standard specifies the Mandatory and Optional Requirements based on the Category of Vehicles and overall length of a vehicle.

## Visibility of Light

The light being emitted when used must be visible at a minimum of 15° upwards and 5° downwards from the horizontal plane and a minimum of 45° to the right and left if a single lamp is required. If mandatory requirements specify 2 lamps a minimum of 45° outwards and 30° inwards from the vertical plane. The 2 optional lamps can be fitted to the side of the vehicle if desired. However, the angle of the lamp cannot exceed 15° relative to the medium plane of the vehicle and can be positioned downwards with no mandatory angle prescribed.

## Position of Lamps

No requirement with width position. Lamps must be installed in a position of no less than 250mm and no more than 1200mm from the ground, and for the mandatory number of lamps be positioned at the rear of the vehicle.

## Number of Lamps

All trailer categories TA, TB, TC, & TD, trailer reverse lamps are optional only and are not mandatory. All Category MA - Passenger Cars require a minimum of one reverse lamp to be fitted and the option of a secondary lamp. All Vehicle Categories less than the total length of 6000mm require one mandatory lamp and option of a secondary lamp. Translate all other categories of vehicles with a length exceeding 6000mm require two lamps as mandatory and two additional lamps as optional.

## Search or Work Lamps

Additional lights to be used for temporary purposes such as handling loads or providing additional illumination in off-road situations may be fitted to a vehicle in any location. However, a driver must not use or allow to use any lamp that can or is likely to dazzle another road user. Work lamps are intended to provide maximum light output in both wide flood beams and long range spreader beams for illuminating work areas. In most cases, the light from these types of lamps exceed the maximum light output and are generally not ADR or ECE approved for use as reversing lamps. Below is one such example of an LED Work lamp style lamp which is ECE approved as a compliant Reversing Lamp that meets ADR 01/00 requirements.

## Harness System Reverse Lamp Splitter

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

**DG AS2809**  
Dangerous Goods

**IP68**  
Tested

**RoHS**  
Compliant

The heavy duty truck harness system has provisions for a separate reverse lamp. Simply plug in the reverse adapter plug 7CRB into the harness system, then run a 2 core cable to adapt a reverse lamp, if you require a reverse beeper then add the 2 core splitter 2P3WB for an extra cable and connect beeper.

All connectors have covers available for a secure fitment of the cables insuring Dangerous Goods Rating AS2809.

### Reverse Lamp Splitter (Inline)

Defined by its black colour the 7CRB plug is a splitter from the 7 Core cable that powers the reverse lamps and reverse beeper, the 7CRB has a single splitter and runs parallel with the 7 Core cable. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CRB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBB Cover Dimension  
Width 44mm, Length 177mm

### Left & Right Reverse Lamp Splitter (Inline)

The 7CRRB plug is a splitter that runs parallel with the 7 Core cable that powers the left and right hand side reverse lamps/reverse beeper. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CRRB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBBB Cover Dimension  
Width 44mm, Length 177mm

### 2 Core Splitter Plug

The 2P3WB is a plug that splits one cable into two, this allows the fitter to add as many reverse function products as required. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

#### Part No. 2P3WB

To be used when more than one lamp is required, connect to the black plug of the 7CR series.

#### Part No. 2P3CB

Cover for the 2P3WB.  
Width 35mm Length 126mm

Combination of splitters when more than one reverse lamp or beeper is required at the rear of the vehicle.

## Accessory Products for Reverse Lamp Splitters

### Adaptable Cables and Plugs for the Accessory Blue Wire to suit the Heavy Duty Truck Harness System

The heavy duty truck harness system has provisions for an accessory product to be fitted via the 16 gauge blue wire. Simply plug in the adapter plug 7CMB into the harness system, then run a 2 core cable to adapt an accessory product, if you require a second accessory product then add the 2 core splitter 2P3WB for an extra cable to connect to the product. All connectors have covers available for a secure fitment of the cables insuring Dangerous Goods Rating AS2809.

**Important Note;** Work lights on the harness system are an accessory and should be connected to the blue wire and not the reverse (black) wire. The maximum size work lamps allowable on the blue wire is 120 watts in a 12 volt system and 240 watts in a 24 volt system. If you need to run work lamps at the same time as the reverse light then the blue wire can be connected to the reverse wire at the front of the trailer.

#### Twin Work Lamp Splitter

Defined by its blue colour the 7CMBB is a splitter from the 7 Core cable that powers the accessory wire for work lamps. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CMBB Plug Dimension  
Width 60mm, Length 78mm

Part No. CMAB Cover Dimension  
Width 130mm, Length 177mm

#### Twin Work Lamp Splitter

The 7CBBB is a splitter that runs parallel with the 7 Core cable and powers both the left and right work lamps on the accessory wire, the 7CBBB is a dual splitter inline to the 7 Core cable. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CBBB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBBB Cover Dimension  
Width 44mm, Length 177mm

#### Single Work Lamp Splitter

The 7CBB plug is a splitter that runs parallel with the 7 Core cable that powers the accessory wire for work lamps. Connection covers available for secure fitment and Dangerous Goods Rating AS2809.

Part No. 7CBB Plug Dimension  
Width 37mm, Length 78mm

Part No. CMBB Cover Dimension  
Width 44mm, Length 177mm

- 100% Water Proof
- Specially Designed Plugs
- 5 Year Limited Warranty

## Cable Lengths with Female Plugs and bare wires with 16 Gauge wire for Electric Brakes

2PF100/16G		1 metre
2PF200/16G		2 metres
2PF300/16G		3 metres
2PF400/16G		4 metres
2PF500/16G		5 metres

## 2 Core Splitter Plug

The 2P3WB is a 3 way plug that splits one cable into two, this allows the fitter to add as many accessories as required, always align the arrows on the plugs to ensure the correct connection.

**Part No. 2P3WB**  
To be used when more than one accessory is required.

**Part No. 2P3CB**  
Cover for the 2P3WB.  
Width 35mm Length 126mm

Right shows an illustration of how the blue accessory plugs can be used for brake control.

# INTERIOR & EXTERIOR LIGHTING OPTIONS

By offering a diverse range in interior and exterior lighting, LED have you covered when it comes to your lighting decisions. LED Autolamps incorporate high-quality manufacturing, matched together with super bright LEDs and low-profile compact designs with choices of a switch, PIR (Motion Sensor), touch sensor, or non-switch lighting options. Ideally suited to a caravan, RV, Bus, Trailer, or vehicle interior. LED have the product that you need.

## Fitting Instructions and Technical Drawings

By using supplied screws, pop the pre fitted screw caps by pushing from the back of the lamp. Fit using two exposed fixing points and then reinstall the screw caps. Can be wired for On/Off sensor or constant on.

# LED HEADLIGHT KITS

## 5,000 Effective Lumens

These lamps offer a superior brightness with exceptionally clean white light that is up to 80% more energy efficient than the original halogen style globes. These new upgrade kits contain two LED globes that are easily installed with appropriate plug connectors. The base is manufactured using heavy duty aviation grade aluminium. Fanless heat-sink design ensures efficient heat dissipation so you know these lamps will not overheat the circuitry giving you up to 30,000-hours duty cycle.

COB LED Technology  
Low Consumption  
Greater Light Output

ENIG/Immersion  
Gold Circuit Board

## Fitting Instructions and Accessories

Note: Original manufacturers rubber or plastic lamp dust covers may need to be modified or adjusted to accommodate these lamps. These Headlights are designed for off road use only. Canbus modules maybe required to eliminate dashboard error messages, flickering, non power faults and are sold separately.

## LR Series Dummy Load Resistors

- Premium Quality Products
- Fix Dashboard Errors
- 5 Year Warranty

**IP67  
Rated**

**12 or 24  
Voltage**

**Part Number**  
**LR21W-12/2** - Twin Blister

**Function** Load Resistor  
**Voltage** 12 Volt Only  
**Power** 21 Watt  
**Resistance** 8Ω Ohms  
**Cable** 100mm each side

**Part Number**  
**LR12/2** - Twin Blister

**Function** Load Resistor  
**Voltage** 12 Volt Only  
**Power** 50 Watt  
**Resistance** 6Ω Ohms  
**Cable** 100mm each side

**Part Number**  
**LR24/2** - Twin Blister

**Function** Load Resistor  
**Voltage** 24 Volt Only  
**Power** 50 Watt  
**Resistance** 24Ω Ohms  
**Cable** 100mm each side

**800mm total  
cable length**

**Function** Load Resistor  
**Voltage** 12 Volt Only  
**Power** 50 Watt  
**Resistance** 6Ω Ohms  
**Cable** 400mm each side

**Part Number**  
**SOLR12/400MM** - Bulk, 400mm Cable each side

## LRM Series Load Module

- Low Heat Output
- Multivolt Application
- 5 Year Warranty

**IP67  
Rated**

**9 - 32  
Voltage**

**Part Number**  
**LRM-2 - Twin Blister**

- Detects Vehicle Ohm  $\Omega$  Requirements
- Designed for late model vehicles that display light failure warning
- Corrects fast flashing indicators
- IP67 Shock/Dust & Waterproof

<b>Function</b>	Load Module
<b>Voltage</b>	Multivolt 9-32V
<b>Power</b>	21 Watt
<b>Resistance</b>	8 $\Omega$ Ohms
<b>Cable</b>	100mm each side

**Twin Blister**

Dummy load resistors are designed to draw the same current as a 21 watt globe. They can be used on vehicles that have electronic components that are not LED compatible.

The resistor should ALWAYS be wired between the input wires of the lamp, NOT the chassis of the vehicle or trailer. If fitted to the chassis, a bad earth connection is possible, and can result in problems with the lighting system of the vehicle.

**Indicator Circuit:** If fitting to the indicator circuit, fit one lead of the resistor to the positive supply side (Yellow wire) and the other lead of the resistor to the negative supply or ground input wire (White).

**Brake Circuit:** If fitting to the brake circuit, fit one lead of the resistor to the positive supply side (Red Wire) and the other lead of the resistor to the negative supply or ground input wire (White).

**Correct Fitting:** To fit the resistor, use the crimp terminals supplied (LR12/2, LR24/2, LR21W-12/2 or SOLR12/400MM only). Cut the loom and re-connect the cut wires within the supplied crimp terminal with one side of the resistor crimped into that terminal. Repeat the process for the remaining wire and the other end of the resistor. Use the screw points on the resistor/module to secure it to a metal chassis.

**Warning:** The resistors/modules can reach temperatures up to 170°C, do not mount the resistor on any surface that can be melted by the heat of the resistor, this includes plastics, hoses or painted surfaces.

## CANBUS Headlight Globe Error Solutions

- Eliminates Error and Non Power Faults
- Eliminates LED Flickering
- 2 Year Warranty

**IP65  
Rated**

**12 - 14  
Voltage**

**Part Number**  
**H4CANBUS** - Twin Blister

**Function** CANBUS Module  
**Size** 65mm x 42mm  
**Voltage** 12-14 Volt  
**Current** 4 Amps Max  
**Plug** H4 Male/Female  
**Cable** 290mm Total Length

**Part Number**  
**H7CANBUS** - Twin Blister

**Function** CANBUS Module  
**Size** 65mm x 42mm  
**Voltage** 12-14 Volt  
**Current** 4 Amps Max  
**Plug** H7 Male/Female  
**Cable** 295mm Total Length

- Detects Multiplexed System BSI
- 2 Year Warranty

## THE ADR SOLUTION TO FAST FLASHING INDICATORS

Not compatible if the vehicle indicator system is controlled by a body control module.

**ILS Microprocessor Unit**

**ILS Relays**

**Part Number**

**ILS3P12** - 12 Volt systems, Boxed

**The I-LS Microprocessor** prevents unreliable failure signals being generated from indicator lamps, which can be caused by the extremely low current draws used by LED lamps when installed on traditional bulb lighting systems.

**Our I-LS Relay** has been designed to be used in conjunction with our I-LS Microprocessor, allowing the reliable detection of an LED indicator failure. The system alerts the driver when an indicator has failed by increasing the flash rate, or terminating an indicator light on the dashboard.

- Fixes fast indicator flashing
- Will pick up LED failure
- Maximum load 140 Watts
- ILS Smart relay IP67 rated
- Operating temperature -40°C to +80°C

## ELECTRONIC CANBUS UNIVERSAL WIRING KIT

For tow-bars with electronic fault detection. Detects light system with double function.

**Part Number**

**CANBUSKIT** - 12-24 Volt systems, Boxed

**Kit contains;**

1 x Module      1 x Red/White battery cable      1 x Trailer plug cable      1 x Cable to vehicle      1 x Kit bag

This wiring kit can be installed in the majority of passenger or commercial vehicles, without any interference with electrical system, and compatible with:

- BSI systems with multiplexed cable (Lights with mixed voltages) - 12 or 24 volts
- CANBUS data system - Check-Control (Sensor failure light SFL)
- Bulbs and/or lamps with LED diodes

The module is protected against short circuits and prevents any overload or failure in the electrical system of the vehicle by feeding the trailer lamps directly from the vehicle battery, independently of the rest of the vehicles electrical system.

- The module detects when the trailer is connected
- Light systems with double function by only one cable (Multiplexed system BSI)
- Easy to fit with fast connections saving time of assembly
- Low power consumption in standby mode

**The universal wiring kit must be installed by professional automotive electricians.** This product has a 2 year warranty subject to the kit being fitted in accordance with the manufacturers fitting instructions. LED Autolamps will in all circumstances only offer to replace a faulty product.

## Standard & Heavy Duty 7 Pin Sockets and Plugs

- Premium Quality Products
- Low Zinc Alloy

**Part Number**  
**7PPLUGSDB** - 12 Volt, Bulk

**Part Number**  
**7PSOCKETSDB** - 12 Volt, Bulk

Fit onto flat surface using screw points in bracket.  
Please refer to ADR 13/00 for mounting instructions.

# Designed for Trays

## Easy Upgrade to LED Rear Lighting

Upgrading or fitting trays to LED rear lighting has never been made easier with our new plugin lamp and patch cable system. We have made available our most popular rear combination lamps that have been prewired with load resistors assisting with fast flashing indicators or error messages as well as terminated with quality Deutsch connectors. The key is the ability to adapt to the vehicles existing harness system, and with our comprehensive range of vehicle patch cable adapter plugs suiting most popular branded vehicles, you will not be disappointed with the choice. A handy additional feature is the ability to adapt to our existing plugin marker and licence plate lamps. To complete the system, we also have an extensive range of separate patch plugs and connectors. We can also help with bespoke, custom OE or specific requirements as well.

**Below are a few examples of how you can use this system to suit your vehicles specific lamp and wiring requirements.**
